

A1 Plank

Description

The model A1 plank is characterized by a straight shape.

It's a quick and easy system thanks to the special snap-on-hook structure. The independence of mounted planks allow an easy inspection of the ceiling.

A 15 mm gap makes the metal ceiling open.

The A plank is also available in various sizes and allows customers to choose the dimension of the plank that best suits to needs of the project.

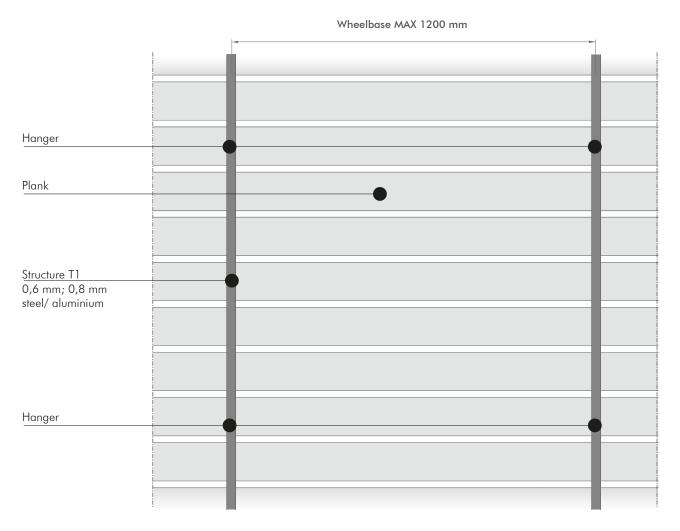

Main features

Dimensions	-A1Plank: 35mm; 85 mm; 135 mm; 185 mm; 285 mm (min. thickness 0,6 mm)		
Height	14 mm		
Gap	15 mm		
	-Coil coated Steel: 0,5 mm; 0,6 mm; 0,8 mm RAL 9003, 9006		
Material, Thickness and Colour	-Coil coated Aluminum: 0,5 mm; 0,6 mm; 0,8 mm RAL 9003, 9006 (custom RAL on request)		

A1 Plank

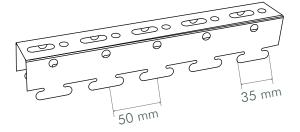

Components

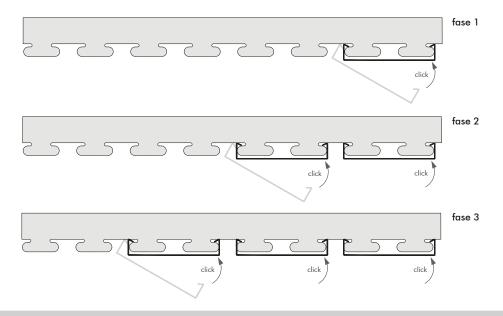

NOTE: wheelbase indicated refer to material mounted in interior spaces and completed by any "L" perimeter profile and are to be considered valid only in relation to the weight of the metal ceiling. These indications are generic and in any case remain to be verified for each individual order, in relation to the material identified for the crosspiece and plank, and relative thickness.

T1 Structure

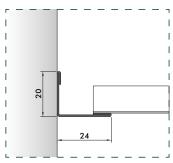

T1 STRUCTURE is available in steel and aluminium with 0,6 or 0,8 mm. of thickness

Mounting system

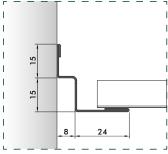

Perimetral's details

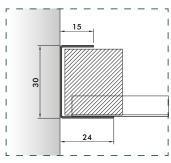

P2_L 3000 mm

Each profile can be achieved with customized section in according to customer's requests.

P11/A_L 3050 mm

* Supplied on request with polystyrene to maintain in the form the cut panel (supplied not pre-assembled)

P10 *_L 3000 mm

Diameter: 1.5 mm Perforation area: diagonal Inter-axes: 4x4 mm For width: 100 - 150 - 200 - 300 Perforation surface: 22% approx.

Diameter: 2.5 mm Perforation area: diagonal Inter-axes: 4.3x7.5 mm Perforation surface: 30% appross.

Diameter: 2.5 mm Perforation area: regular Inter-axes: 5.5x5.5 mm For width: 100 - 150 - 200 - 300 Perforation surface: 16% approx.

Diameter: 4.5mm Perforation area: regular Inter-axes: 7.27x7.27 mm Perforation surface: 30% approx. Profilsystem Desio s.r.l Data sheet - rev. 2 - 07/01/2020

General informations

Technical standards

All Profilesystem products are CE marked according to EN 13964. They are also accompanied by the Declaration of Performance (D.O.P.) as required by European regulation 305/11 concerning the placing of construction products on the market.

For applications in particularly aggressive environments such as swimming pools, industrial installations with chemical and / or corrosive fumes, check the most suitable material and surface treatment with the technical or commercial office of Profilesystem.

Storage

All products are carefully packed and placed on special pallets and secured by strapping and film wrapping. On request we can provide the package complete of cardboard corners, bubble wrap and polystirene to reduce the risks during transport.

It is always recommended to handle all packaging with the most care, avoiding shocks and practices that damage the contents. The packed material is stored in closed, clean and dry places until the time of pic-up.

Do not expose filmed products to heat sources and do not leave theme under the sun.

Installation

The metal ceiling are installed manually by the installator depending on the type and model you choose.

The material should be stored in closed, clean and dry places until the time of installation.

Do not rest on the ground and not leave the products on site without the original package issued at the time of delivery.

Avoid the contact between material and water, solvents, degreasers and aggressive liquids.

Cleaning and Maintenance

Metal ceilings, thank to the easy washing and cleaning are also a guarantee in terms of hygiene.

To remove dust, stains or smudges you can use carefully a clean, dry cloth or moistened with neutral detergent, or non-abrasive and non-aggressive disinfectants.
